

Document Name: Acer ePower Management Release Notes	Doc. No.:	Revision: 1
	Release Date: 2008/4/23	Page: 1 of 14
Project Name: Acer ePower Management		

1. Product Release Information

Product Name: Acer ePower Management

Release Number: V3.0.3008

Release Date: 2008/4/23

Customer Support: Jones Hsu

2. Introduction

This document contains the release notes for ePower Management. The following sections describe the release in detail and provide late-breaking or other information that supplements the main documentation.

3. What's New

- 3.0.30087, April 23, 2008
 - i. Issues solved
 - 1. [0196][FI] The wording of "Power Plan" tab is cut and sleep and hibernation setting lost comma ",",
 - 2. [0198]The Remaining is show -1 when battery is bad
 - 3. Change "Unknown" to "N/A" in battery dialog
 - 4. Fix Intel C3 issue on DC mode
 - ii. UI/Specification changes
 - None
 - iii. 3rd party library
 - None
 - iv. Known issues
 - None
 - v. Limitation list
 - 1. This version should be installed with ETF 3.0.3005 or later.
 - 2. Upgrade from previous version, like v2.0 or v2.5, is not supported.
 - 3. eAP UI only supports 96, 120 dpi

Document Name: Acer ePower Management Release Notes	Doc. No.:	Revision: 1
	Release Date: 2008/4/23	Page: 2 of 14
Project Name: Acer ePower Management		

4. In some languages (ex. TC), redundant "?" in InstallShield wizard when upgrading eAP.
5. In some languages (ex. SV), the license statement UI of installer is not arrange well.
6. ePower only supports notebook platform. For desktop platform, ePower installer will close automatically and no error message.

4. Minimum System Requirements

System Processor: Intel or AMD IA32 processor

System Memory: 512MB+

Free Disk Space: 50MB+

Operating System: Microsoft Windows Vista x86/x64

Existing Software: .NET Framework 2.0

5. Installation and Upgrade Notes

- Normal Installation
 - Double click installer program
- Normal Installation with option
 - None
- Silent Installation
 - Using the following command line to execute the installer program
 - InstallerProgramName.exe -s

6. Version History

- 3.0.3007, April 8, 2008
 - i. Issues solved
 1. Add "Not charging" as one of battery status.
 2. Add multi-language for ETF 3.0.3005 version checking in installer
 - ii. UI/Specification changes
 1. Take out battery health.

Document Name: Acer ePower Management Release Notes	Doc. No.:	Revision: 1
	Release Date: 2008/4/23	Page: 3 of 14
Project Name: Acer ePower Management		

- iii. 3rd party library
None
- iv. Known issues
None
- v. Limitation list
 1. This version should be installed with ETF 3.0.3002 or later.
 2. Upgrade from previous version is not supported.
 3. eAP UI only supports 96, 120 dpi
 4. In some languages (ex. TC), redundant "?" in InstallShield wizard when upgrading eAP.
 5. In some languages (ex. SV), the license statement UI of installer is not arrange well.
 6. ePower only supports notebook platform. For desktop platform, ePower installer will close automatically and no error message.
- 3.0.3006, March 20, 2008
 - i. Issues solved
