Configuration Guide for Yealink IP Phone & Datus PBX

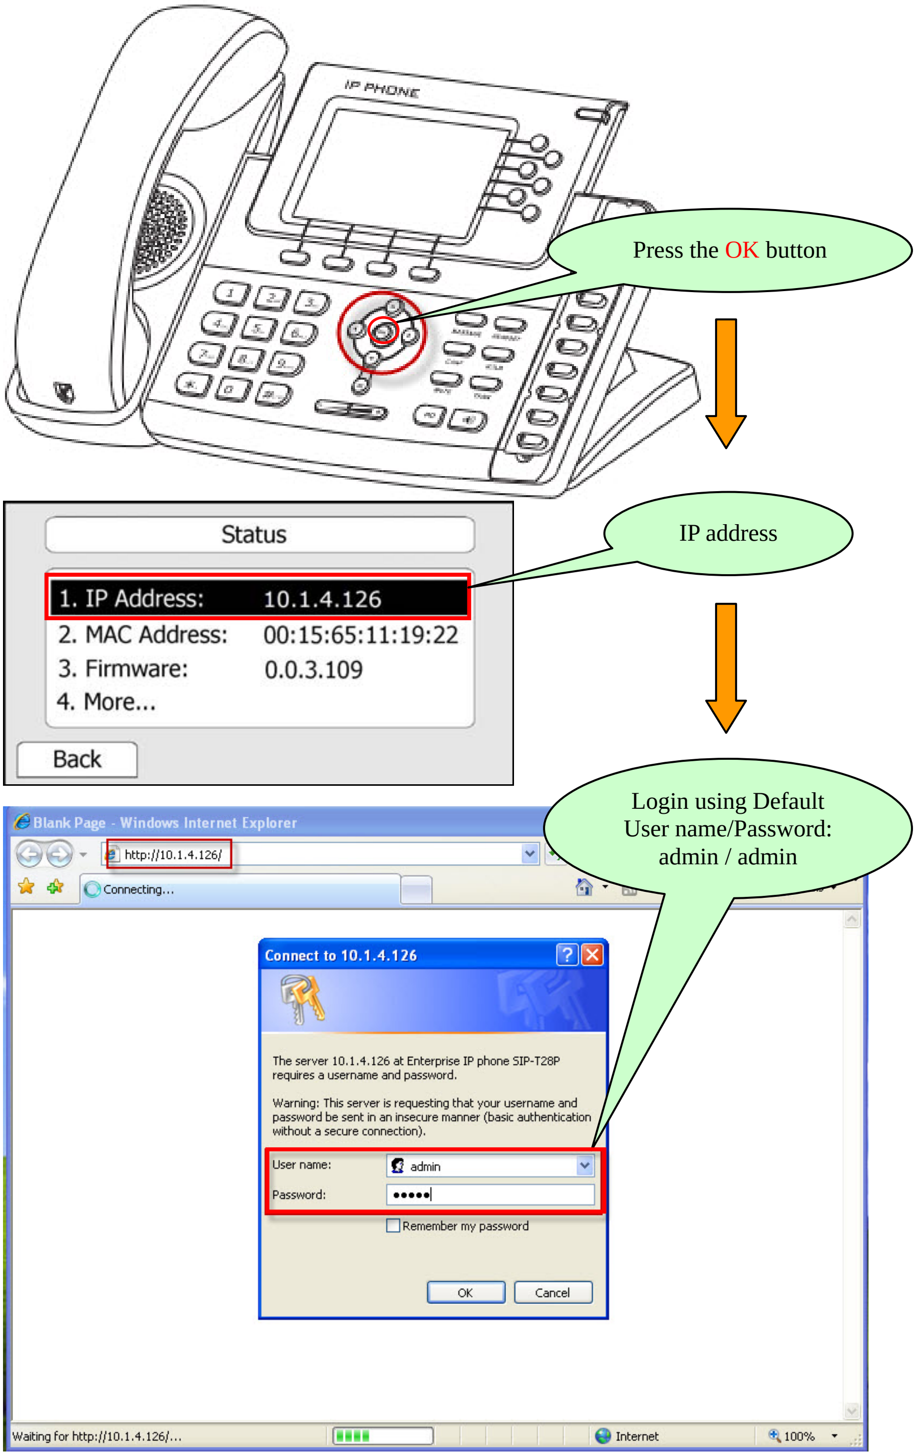
Contents

1. Requirements and Preparation

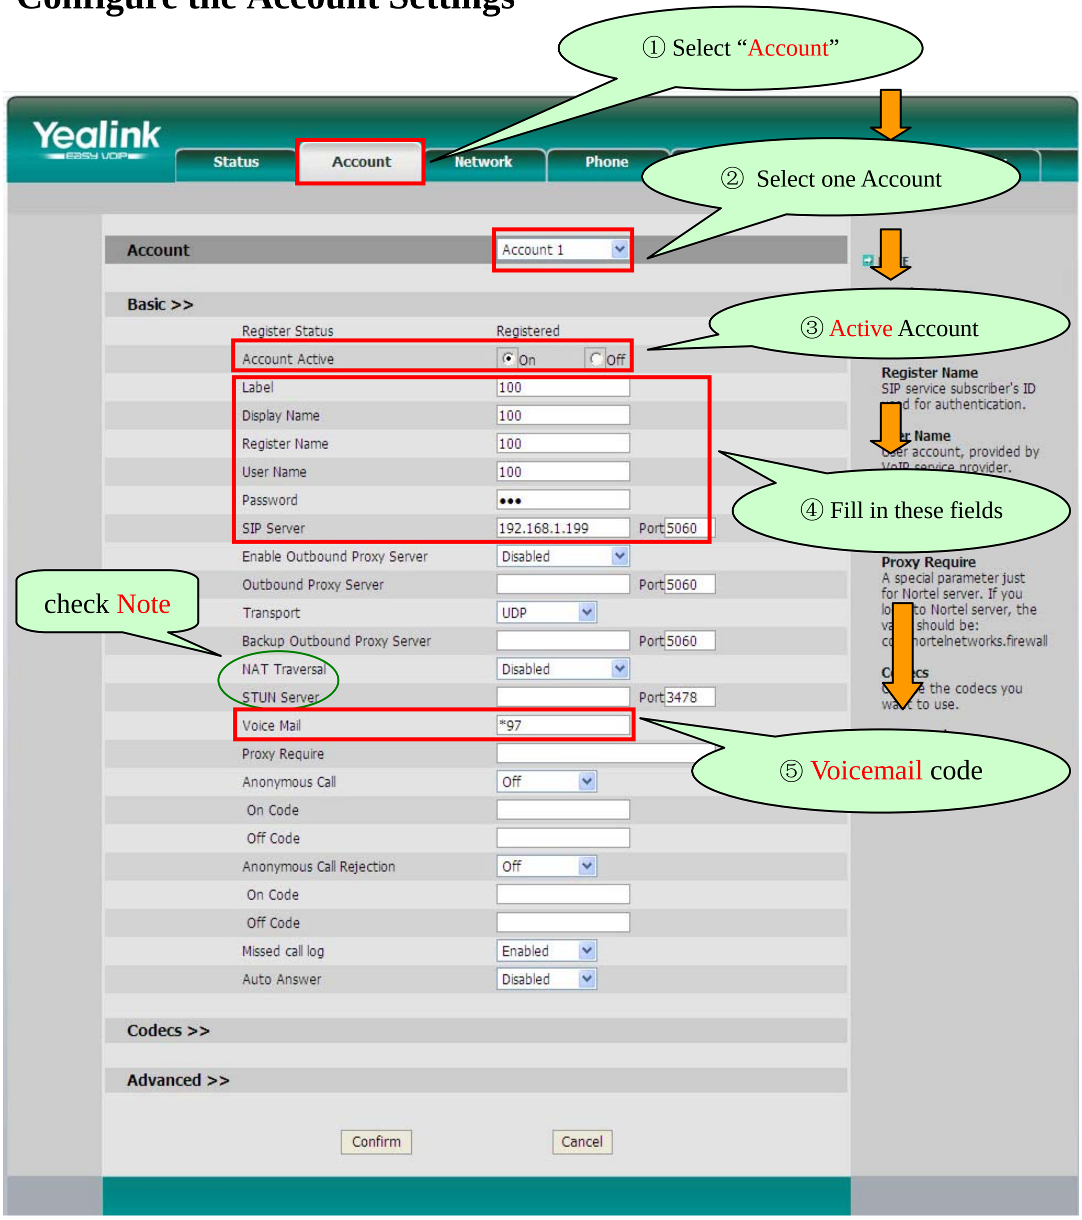
- Software image v15-10-01-B07 or higher running on the epcx86.
- Software image x.42.x.x or higher running on the Yealink IP Phone.

2. Configure Yealink IP Phone

2.1 Login to WEB management



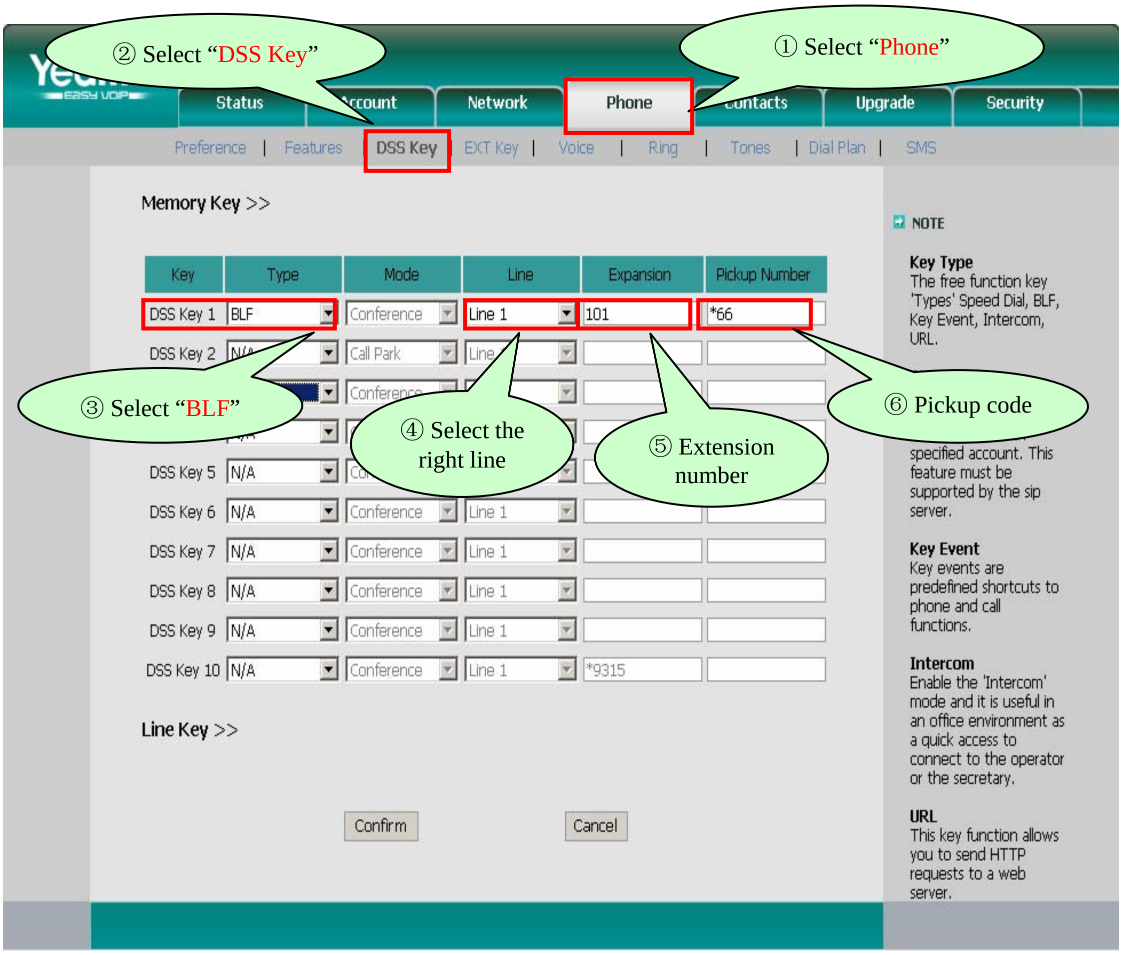
2.2 Configure the Account Settings



After entering the above settings, Account1will be available to make calls.

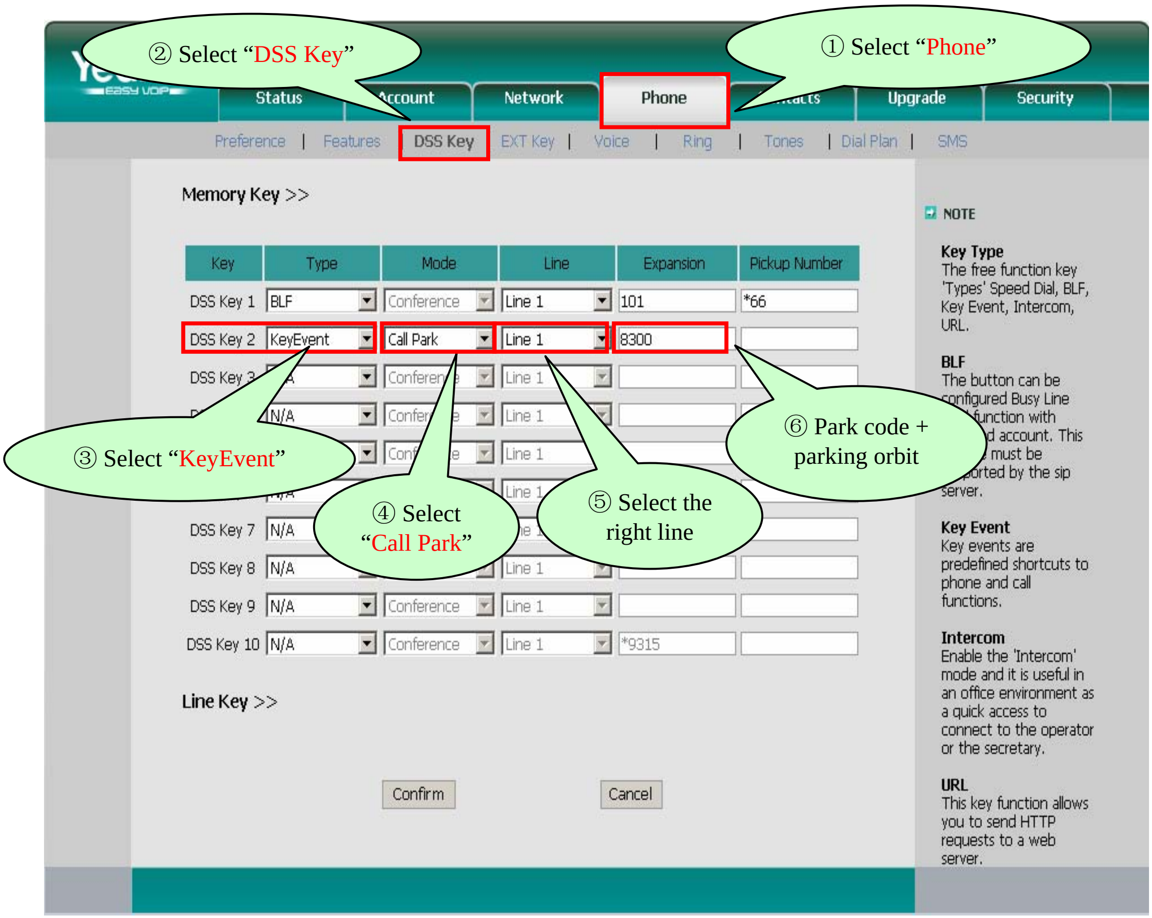
Note : If the SIP server is behind a NAT, you should enable "NAT Traversal" as "STUN" and then specify a STUN Server. For more details about STUN, please refer to http://www.voip-info.org/wiki/view/STUN. To learn about NAT, you should refer to http://www.voip-info.org/wiki/view/NAT+and+VOIP

2.3 Configure the DSS Key as BLF



After entering the above settings, DSS Key1 is ready as BLF for Line 1, monitoring Extension 101. When there's an incoming call on 101, DSS Key1 will flash red and you can directly press it to pick up the call.

2.4 Configure the DSS Key as Call Park



After entering the above settings, DSS Key2 is ready as Call Park for Line1.

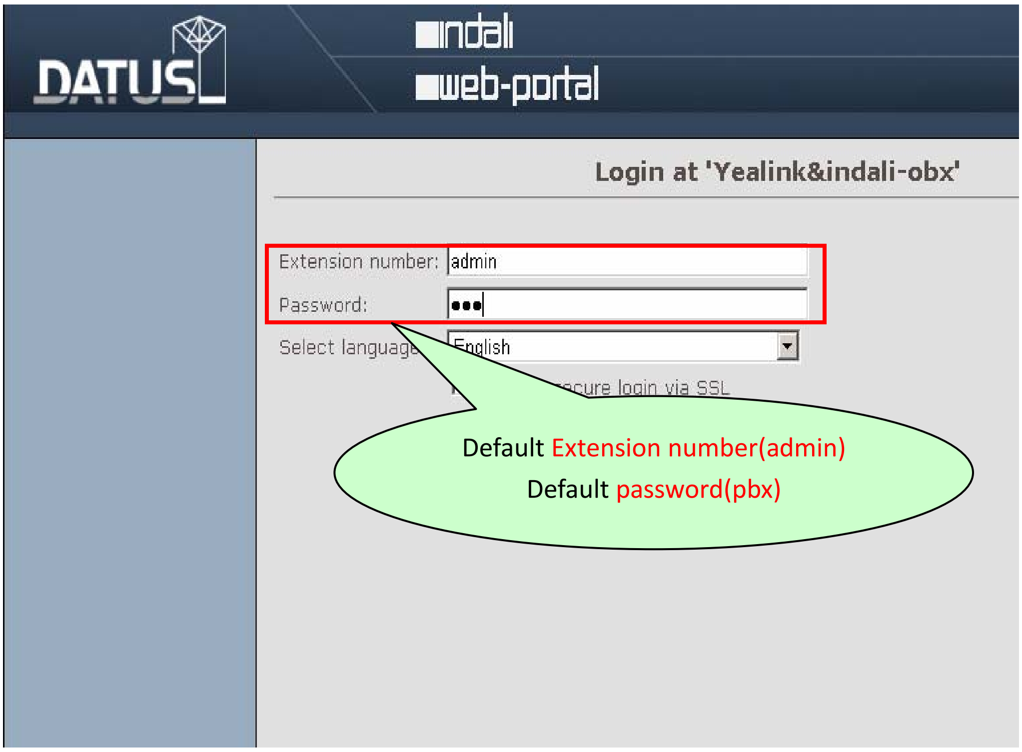
An active call can be parked by pressing DSS Key2 during your conversation.

3. Auto-configure Yealink Phone

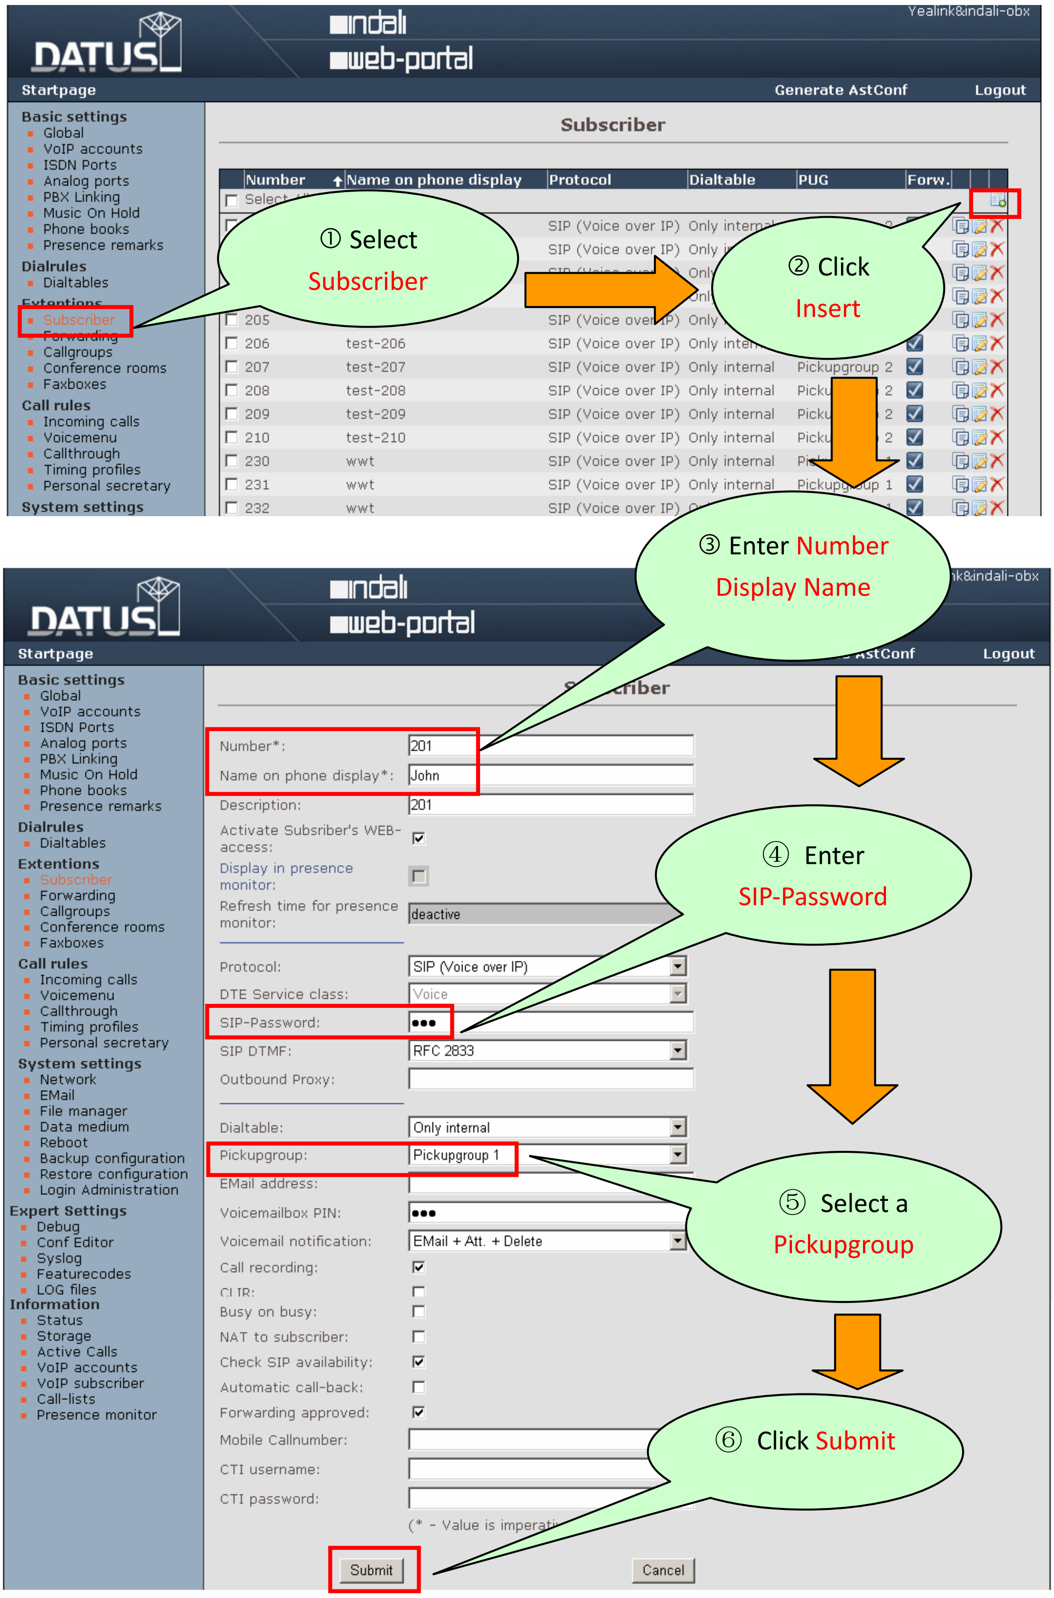
Please refer to Yealink Document Auto Provision Manual:
http://www.yealink.com/fae/Auto Provision Manual.rar

4. Configure Datus

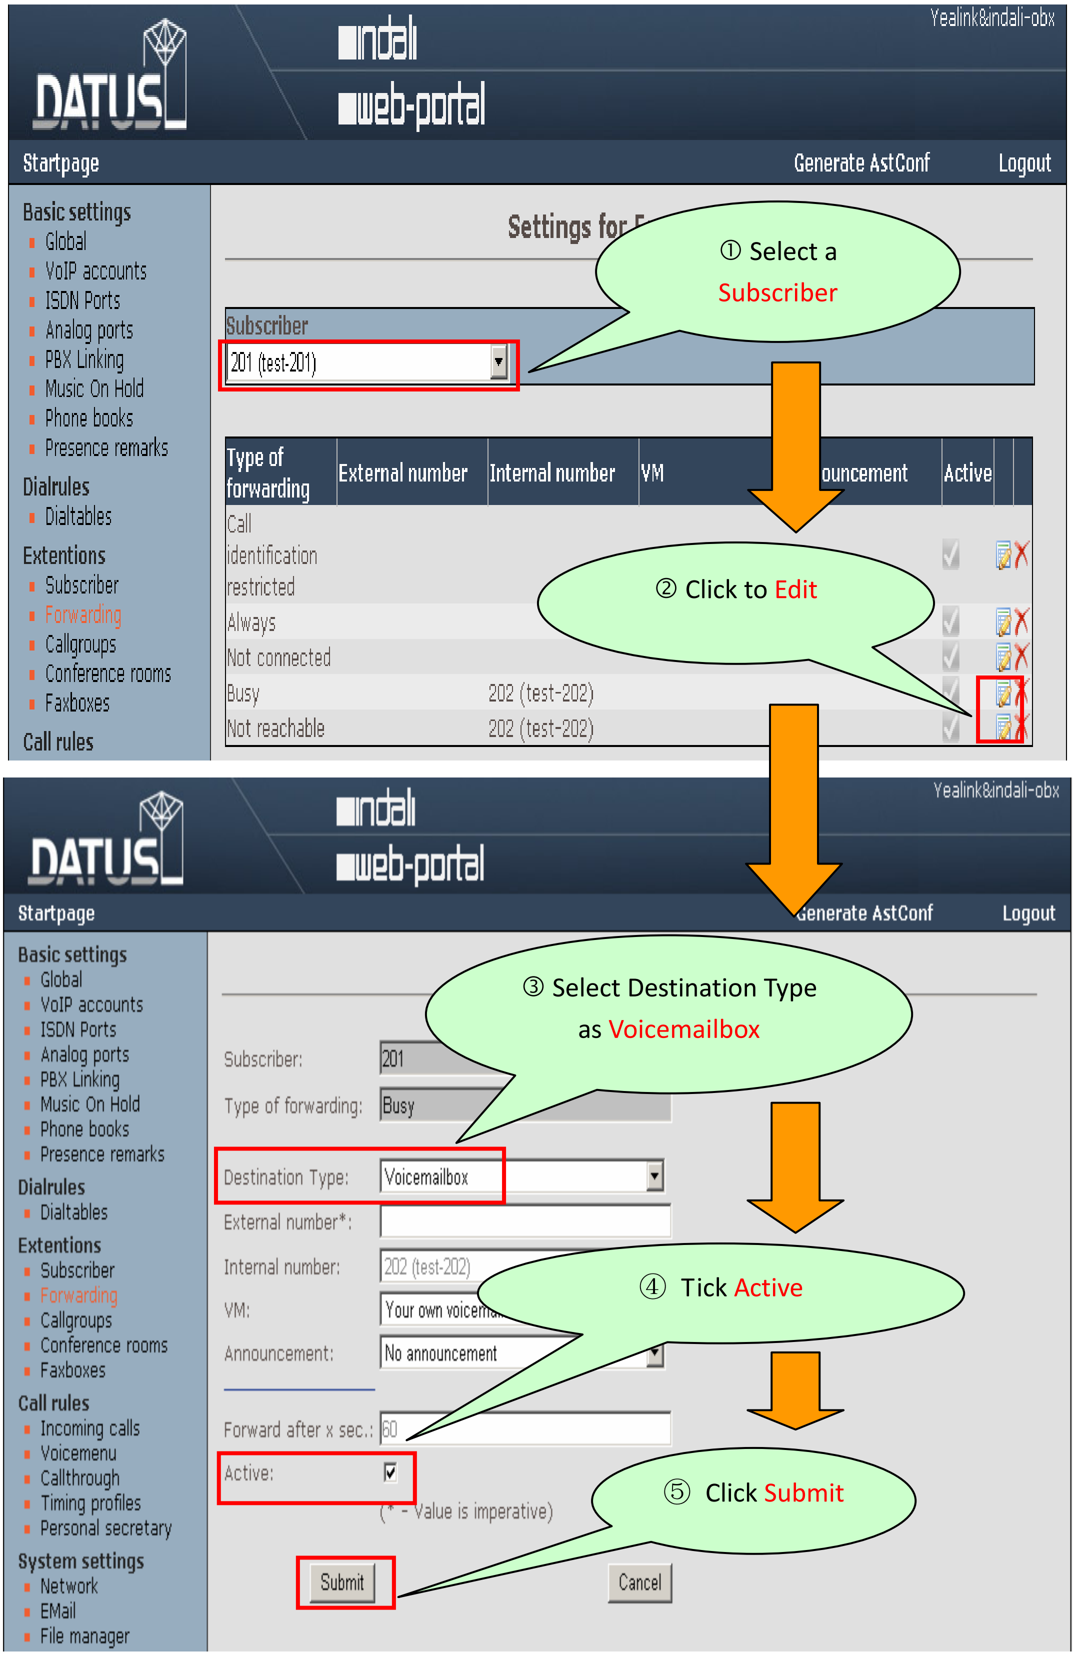
4.1 Login to Datus



4.2 Add a Subscriber



4.3 Active VoiceMail



Appendix

1. Default Basic Dial Code on Datus System

Voice Mail（VMail）	*97
Call Park	8300
Callpark Retrieve	8301
