After the verification that has been performed in Huawei IMS Interoperability Testing Lab, Huawei announces that the Yealink SIP Phone Series have been formally validated to be interoperable with Huawei IMS. The devices listed above have met an acceptable level of conformance with the Huawei IMS SIP interface.

Huawei validates that the devices work properly with the Huawei IMS release. Huawei does not validate qualitative aspects of the device or other device capabilities, which are outside the scope of the SIP signaling interface.

This validation also applies to all subsequent maintenance releases to this device version.
